## COAL MINE DISORDER RESULTS IN MANY DEATHS

### Nation Facing Major Industrial Crisis in Entire History

#### PEACE OUTLOOK IN RAIL STRIKE LOOKS GLOOMY

Forces Increased by Hundred Thousand Men By Waymen in New York Walking Out

#### OTHERS THREATEN TO QUIT

Seventy Shop Employees in Chicago Suffering from Poison As Result of Food

CHICAGO, July 17.—Peace prospects in the railroad strike were dimmed today by the addition of approximately 100,000 men to forces of the strikers. Negotiations for settlement are temporarily at a standstill with no positive indication as to the next move or possible results. It is believed the nation this week will meet the major industrial crisis of its history. Seventy thousand maintenance of way men in the New York switching area were scheduled to leave their posts in answer to the regional strike call. To this number were added close to 10,000 others—stationary firemen and engineers throughout the country. Trucks and freight handlers are also being out.

Seventy new shop employees of the Chicago, Milwaukee & St. Paul, and seven city policemen are suffering from poisoning as a result of food served to the railway strikebreakers. The men were stricken during the last three days, ten yesterday. A score of health department workers were assigned to cover every railway yard in Chicago to rigidly enforce food served to the workers to prevent a recurrence of the trouble. The policemen stated they had eaten lunch in dining cars provided by the railroad.

#### OPERATIONS AT CAMP TAYLOR SATISFACTORY

Taylor and Sanger Will Continue to Exploit Storm Cloud in Systematic Manner

"We will proceed with development of the Storm Cloud property at Camp Taylor," remarked F. H. Taylor Sunday, who is associated with W. A. Sanger, "regardless of the fact that the option held by others has been surrendered. The showing is better today than at any time since development was first instituted, and we have not lost faith in the proposition. On the other hand, at a depth of 70 feet the vein matter is strong and well-defined, and the values remain intact. Drifting was prosecuted from the 70-foot point for a distance of 20 feet in each direction, but the ledge was not crossed. This ledge on surface crops in places to a width of 50 and 60 feet, so it is impossible to determine at this time the width of the vein at the 70-foot point."

Mr. Taylor stated that the lease being operated by James Shea and associates was making a splendid showing, and the shaft is being lowered on a fine looking vein of commercial grade ore. Other owners of property in the district are prosecuting development and the showing is up to expectations.

#### BRITISH TO SEND DELEGATES HERE FOR REFUNDING

LONDON, July 17.—A special British delegation will arrive in the United States early in September in connection with negotiations for refunding the British debt to America. It was announced today by Lloyd George in the house of commons.

#### MAIL HELD UP RESULT STRIKE WORK INFORMED

Sympathizers of Shopmen and Coal Strikers Refuse to Permit Crews to Work

WASHINGTON, July 17.—The railway mail superintendent at Chicago notified Postmaster General Work today that the Burlington train sets the track yesterday at LeVella, Ia., and that striking coal miners and shopmen's sympathizers persistently refused to permit the wrecking crews to clear the tracks. Passengers and train wrecking crews have been driven away from the train, he added, and the tracks have been blockaded, thus delaying the movement of the mail.

#### BELLEHELEN TO BECOME ACTIVE MINING CAMP

President Green of Merger Company is Called to Boston On Financial Mission

Prospects are unusually bright for the early inauguration of a large campaign of development upon the Bellehelen mine in the district bearing that name. M. M. Green, president of the Bellehelen Merger Mines company, will leave Tuesday morning on a hurried trip to Boston, where the deal will be closed for the financing of the company to the extent of \$100,000, the amount of the bond issue recently authorized.

Albert Kurris, who has been in Boston for the last month, wired to Mr. Green to get to that city as fast as the train can carry him, announcing that capitalists had agreed to take over the bond issue. Mr. Kurris is an old Boston resident, and is highly connected, and following his explanation of the wonderful possibilities of the Bellehelen district and of the great ore showing that is in evidence at the Bellehelen mine, where it is estimated by engineers that \$1,000,000 is in sight and ready for extraction, Mr. Green at once began making preparations to leave for the east Tuesday that the finishing touches may be put upon the bond issue.

Upon the return of Messrs. Green and Kurris, in about a month, there promises to be something stirring in the Bellehelen district, one of the oldest and acknowledged rich mineral fields of Nye county. It is planned to at once begin construction work upon a milling plant that will have an initial capital of treating 50 tons daily, but the building will be large enough to permit of adding two units of 50 tons each as soon as conditions warrant. Owners of property in the Bellehelen district will be pleased to learn of the trend of events which means so much for the future of that section. Already there is considerable life in that locality and owners of property have been prosecuting development in a small way for the last several weeks, with the result that a number of promising finds have been made.

#### CITY OF CORK SUFFERS BADLY THROUGH RIOTS

Republican Forces Said to Be in Absolute Control and Port of Cork is Closed

#### BUSINESS PREMISES SEIZED

Outbreak of Robbery and Destruction Follows, According to Refugees in Belfast

BELFAST, July 17.—Reports reaching here report the city of Cork is suffering grievously at the hands of republican forces who are said to be in absolute control. The port of cork has been closed, it was said, ships not being allowed to enter or leave, business premises have been seized and the contents appropriated for republican troops, many of whom are billeted with the civilian inhabitants and several thousand men are out of work. Moreover, there has been an outbreak of robbery and destruction, according to refugees arriving here who have been interviewed by reporters for the Belfast telegraph.

DUBLIN, July 17.—During the week end operations, the national army troops captured about 500 prisoners from the republican insurgents, it was announced.

#### MORAY DISTRICT HAS GREAT LEAD MINERAL FIND

Considerable Activity is Now Manifesting Itself in Region Long Neglected

The old Moray district is receiving considerable attention at the hands of mining men and investors and there promises to be much activity in that locality during the next few months. The fact that the original Moray mine has been taken over under a five-year lease from the Bernhells of New York by Victor Barndt and associates who plan rebuilding the mill and installing flotation augurs well for that section, and it should not be many weeks until production will be in order.

Four miles to the north of Moray, John McGilvray, old time prospector of southern Nevada, has made a location of much promise, and samples of the ore that are being exhibited in Tonopah show values of better than 70 per cent lead and 22 ounces in silver a ton. This ore was taken from a 35-foot cut and two feet of solid galena is exposed. There are about 100 tons of this ore on the dump, but the same could not previously be marketed owing to the long haul and excessive freight rates. With Henry Ford taking over the Eureka & Palisade railroad, later to be broadgauge, it is believed that a reduction in rates will follow, which will make marketable the product of the mines of the Moray district.

The Moray district lies 50 miles north of Tonopah and 60 miles south of Eureka. This naturally makes the latter place the most desirable shipping point, although the road leading to Tonopah is in good traveling condition.

With Mr. Barndt and associates operating the mill on the Moray property and treating ore by the flotation process, Tonopah will naturally be benefited as this town will naturally be the feeding point.

GOLF CLUB ORGANIZED. HAYWARD, Calif., July 17.—Golfers residing in Hayward have organized a club, the first of its kind ever formed here, and are planning to select a site near here for a course and clubhouse.

#### MASSACHUSETTS CITY PARTIALLY FLOODED

CHICOPPEE, Mass., July 17.—Twenty million gallons of water flooded a large part of the Williamsett district here when the Lagnwaide dam and another dam at Robert Pond, gave way, evidences and business houses along the streets were flooded above their first floors, and the occupants forced to flee to the upper floors for safety. Boston & Main tracks were washed out in half a dozen places.

#### BUCKHORN MINE GOES OVER TO A NEW COMPANY

E. P. Cullinan Will Sponsor Operations to Be Carried Forward on Big Scale

A mining transaction of more than passing interest has just been consummated whereby E. P. Cullinan, well known mining man and manager of the New Tonopah Division Mining company, takes over the Buckhorn property in the Stone Cabin district. The Buckhorn is owned by John Noy, but has been held under bond and lease by E. Marx, Carl Monahan, Louis Camp, Charles H. Slick and Charles Young, who have prosecuted a campaign of development with highly gratifying results during the last year.

In concluding the deal all of the men above mentioned will retain a stock interest, and it is the intention of Mr. Cullinan to proceed with the formation of a new company which will be entirely taken over by the New Tonopah Division and proceed with a systematic and comprehensive campaign of development, with a view of placing the Buckhorn upon a producing basis in the shortest time possible.

Minerally high grade was recently encountered in the Buckhorn workings on the 160 level of the shaft working. The ore is unusual in character by reason of showing liberally of ruby silver, native silver, silver bromides and black bromides, but its richness cannot be gauged.

Dump sampling shows values of about 170 ounces silver, while from the fines a value of between 40 and 50 ounces silver may be expected. The high grade picked up on the 160 level comes from a cross vein and picked samples show values running into the thousands of ounces. With a strongly financed company operating the Buckhorn, other properties in that locality will no doubt be receiving attention in due course, and it is barely possible that the Stone Cabin section will be heard from in no uncertain way before many months have passed.

#### U. S. MARSHALS CURB TROUBLE IN CALIFORNIA

San Bernardino Strikers are Brought to Terms and a Truce is Ordered

SAN BERNARDINO, July 17.—Meetings yesterday between representatives of the striking shopmen and representatives of the United States marshal, local authorities and State Labor Commissioner Mathewson, resulted in the cessation of disorders here and in Cajon pass that earlier caused the arrival of a group of deputy marshals and a call on the governor for state troops. Assemblages of strikers and sympathizers near the shops, and attempts to halt men going to work were practically ended by activities of the marshals.

#### DEBS IMPLORES STRIKERS WAGE FIERCE BATTLE

Issues Statement to Men Now Out to Strike and Vote and Fight Together

#### SEEMS TO CONDONE VIOLENCE

Says Only Violence Has Been the Injuring of a Few Non-Union Workers

CHICAGO, July 17.—Eugene V. Debs, leader of the great American railway union in 1901, issued a statement today to the striking railroad men and other strikers, that the time has come for the strike and for the men to go out to strike and vote and fight together. "There has been some slight disorder, and a few souls have been hurt. The 900,000 men of the strike, however, it has been sufficient to bring to the surface what they thought for in the last world war," he said.

WEEKLY WEATHER FORECAST. WASHINGTON, July 17.—Summer weather, moderate and pleasant, with some showers and occasional thunderstorms, but generally fair. Pacific states generally fair, with some showers and occasional thunderstorms. Atlantic states generally fair, with some showers and occasional thunderstorms.

#### NEW CONTRACT SINKING SHAFT AT ARGENTITE

Watterson Brothers Will Explore Property by Putting down the Second Shaft

Argentite properties, to exhibit a considerable amount of mining activity, and the announcement made Sunday that the Watterson Brothers, of Idaho, had entered a contract to sink a new shaft located 200 feet to the north of the main workings, augurs well for the district generally. Operations in the main shaft are being steadily forward, although the work will be curtailed to a considerable extent pending the building of the new road from Coyote Springs to Silver Peak. With this undertaking completed, which has been assured through a resolution passed by the county commissioners of Esmeralda county, through a bond issue, shipments of ore will be started from both the Francis mine, owned by the Watterson Brothers, and the Mohawk property, operated by L. E. McKim and Sir Ralph Page, representing a syndicate of English capitalists.

There is ready for shipment a large tonnage of splendid grade ore from the Francis mine, and with the cut-off road constructed, it will be possible to transport the product at a greatly reduced rate, and at the same time permit of taking in water and other supplies at a minimum of cost. Sinking of the Mohawk shaft is again in order, and it has practically been decided to continue the work until the 500 level has been reached.

Frank Immann has been awarded the contract for sinking the new shaft on the Francis property and already has work well under way.

#### MAINTENANCE MEN NOT TO BE EXPELLED

CHICAGO, July 17.—Members of the Maintenance of Way union who engaged in an unauthorized strike are not to be expelled from the union "for the moment," but brotherhood organizers will be sent to interview the strikers and attempt to persuade them to remain at work pending final decisions as to the national strike.

#### GERMAN PAYMENT OF GOLD MARKS HAS BEEN MADE

PARIS, July 17.—The reparations commission was officially notified today that Germany had deposited 22,000,000 gold marks in the designated banks to meet the July 15 reparations payment.

#### PRESIDENT IS TO SEE MINES ARE OPERATED

Prepared to Plant American Flag at Every Property With Federal Troops

WASHINGTON, July 17.—It was said today in well informed government circles that President Harding, within 48 hours was prepared to direct the mine operators to reopen the mines under protection of federal troops and with the American flag planted at the entrance of every mine to be operated and that operators would be expected to comply immediately with such edicts.

The president has in mind, it was further reported, to pay if necessary, a short time royalty on such coal as will be mined to meet the emergency. If there are insufficient numbers of nonunion miners to operate the mines when reopened under government protection, it was indicated a call for volunteer miners would go out from the government officials believing there are thousands of miners who engaged in other pursuits who would respond to such a call. The same method of dealing with the railroad situation may be used, it was said, if conditions do not soon change for better. The administration it was added, is deterred no longer to be backed in its efforts to see the consuming public and industries of the country get sufficient coal.

#### HAMMER MURDERER IS DECLARED RESPONSIBLE

LOS ANGELES, July 17.—The hammer murder of Mrs. Albert Head was charged to Mrs. Clara Phillips by a coroner's jury following a brief and dramatic inquest. The verdict was death "due to a fractured skull caused by hammer blows at the hands of Mrs. Clara Phillips in a premeditated murder." Mrs. Phillips was not present at the inquest, but appeared at jail to smile at everything and everybody.

#### LABOR DAY TO BE OBSERVED IN THIS TOWN

Big Meeting Will Be Held Tuesday Night at Eagles Hall to Discuss Matters

Owing to so many people spending the weekend out of Tonopah, the meeting called for last night at the Eagles hall to discuss matters relative to holding a big Labor Day celebration, was postponed until tomorrow night at 7:30 o'clock.

Great interest has already manifested itself regarding this event and it is almost a certainty that the local society of Eagles will sponsor the celebration. Business men generally agree that Labor Day should be fittingly observed in Tonopah, and if plans do not miscarry the Fourth of July celebration, which proved such a pronounced success, will be eclipsed. It is planned to have a two-day celebration, starting on Sunday, September 3, and winding up in a blaze of glory on Monday night. It is urged that a large attendance be present at the meeting to be held tomorrow night.

#### SHERIFF KILLED AND 12 OTHERS MEET THAT FATE

Assault Said to Have Been Made By Large Party of Men From Over Pennsylvania Line

#### AMBULANCES TURNED BACK

Firing Reported as Still Going On Along the Road Leading to Standard Mine

WHEELING, Va., July 17.—Sheriff Davall and 12 other persons were killed and no less than 25 wounded in a fight at the Standard mine of the Richmond Coal company, two miles from Wheeling, according to a telephone message from the correspondent of the Wheeling News of Monday. The mine, which has been working on an open shop basis, is reported to have been attacked by a large party of men from over the Pennsylvania line. After the fight they burned the tipples.

Standing behind trees and rocks, high up on the hills, the attackers opened deadly fire, picking off the guards and deputies one by one. After resistance weakened, the attackers swooped down on the mine and set fire to the tipples. Nine of the men, supposed to be striking miners from Pennsylvania, who attacked the mine, have been arrested, and three of them injured, taken to the local hospitals.

STEUBENVILLE, O., July 17.—As bombes carrying newspapermen and ambulances, proceeding from Wellsburg, W. Va. to the Richmond mine, were turned back by hot fire, according to word received here, fighting is still going on along the road leading to the mine.

WASHINGTON, July 17.—Sheriff Lindeman and deputies and the state police broke up a march of men who were on their way to the Green Hill mine near here. Nine arrests were made. The mine has been operating with nonunion men since the coal strike was called.

#### SCHOOL CONTRACT NOT YET AWARDED

No contract has yet been awarded by the school trustees for the construction of the addition to the high school building. Three general bids were received, but all were in excess of the bond issue of \$25,000, but by changing plans and specifications in some ways it is believed the situation can be met. It will be necessary first, however, to obtain an opinion from the attorney general as to whether excess funds in the school treasury can be used to pay cost of settling matters pertaining to the purchase of lots desired in order that the street may be closed. There were three bids received for plumbing, but no official action will be taken until the other matters are adjusted.

#### BUTLER THEATRE

—TODAY—  
A special attraction to every sense of the word.  
The picture that rivals "Hammerque."  
"THE GOOD PROVIDER"  
With the same author director and cast that was in that never-to-be-forgotten picture.
